Team Divisions are determined by the teams average age. To find out your teams average age, add the age of the participants for each leg of race and the divide by 3.

Example: 27 + 39 + 18= 84/3= 28

The teams average age would be 28 years old.

Safety The Triathlon Committee reserves the right to remove any participant from the race that may pose a risk to themselves, other participants and volunteers.
